

Agglomerates

LONG LIFE ABRASIVE BELTS FOR QUALITY FINISHING OF STAINLESS STEELS

Agglomerates are a grain-structure utilised on long-life abrasive finishing belts where the old grain breaks out of the bond continuously and makes way for new, sharp grain. The product objective is to achieve a consistent scratch pattern and even stock removal.

Main Advantages

- Quality and uniform graining achieved throughout the life of the belt
 - Major time-saving properties with fewer operations
 - Cool cutting for stainless steel
 - Consistent finishing
 - Long effective belt life
 - Constant renewal of abrasive whilst in operation
 - Matching finish to pre-grained stainless steel sheet
- ...they keep on graining and graining!
