PWP TRADE PRICE GUIDE

THE WELD BOOK

Hours of Trading

Monday - Friday: 7.00am - 5.00pm

Deliveries

All orders over £50 nett placed by 2pm for ex-stock items are normally delivered next working day, free of charge, in our local area. Due to the weight of Mild Steel (A18) MIG wire, please allow two working days and a carriage charge (TBA) for out of local area deliveries. (Subject to status).

Payment Terms

We accept most major credit cards, BACS & FPS. Certain cards may incur a handling charge, please ask for details. Credit accounts are available on request subject to reference and status checks. (Note: we can no longer accept cash or cheques).

Conditions of Sale

All sales are subject to our Standard Terms & Conditions of Sale, a copy of which is available on request. All prices ex.VAT. E & OE.

COLLECTIONS - CORONAVIRUS (COVID-19)

As protection for our employees and customers, we have had to close our Collection Counter. In light of that, **goods can only be collected if pre-ordered by phone or email** and will be ready at a pre-determined time of your choice no later than 4pm. For non-account customers, collections will also need to be paid for in advance by acceptable debit or credit card. (We are unable to accept cash or cheques). We will still be fulfilling customer orders as usual for our delivery service. Simply call our sales team on 01234 345111 for further details.

WE HAVE PROBABLY THE LARGEST STOCK RANGE OF PROFILE CUTTING CONSUMABLES IN THE UK

TransTig 210MV**NEW FRONIUS TIG RANGE**

- 210A DC output
- Multi-voltage
- DC TIG Welding, Pulsing & TAC
- MMA Welding
- Lightweight and easy to transport
- Overload voltage protection
- USB updates protection
- Easy-change voltage cable / plug

MagicWave 230i

- 3 - 230A output
- Digital control TIG AC/DC power source
- Lightweight and easy to transport
- LCD colour display
- Intuitive and self-explanatory menu navigation
- Pulsing & Job Storage Options
- 110/230V Single Phase Input

Accupocket**BATTERY WELDER**

- Weld anywhere
- 6 x 3.2mm welding rods on a single charge
- Can run off a small 2kVA generator via the charger
- Easy to operate
- Weighs only 11Kg including battery

TransPocket 180MV

- 110v/240v
- 10A to 180A
- Adjustable Hot-Start
- Lift Start TIG Function
- IP23 Protection
- Quick-Change Primary Lead
- Weighs only 8.9kg

FRONIUS ... SHIFTING THE LIMITS**TransSteel 5000 Pulse**

- 500A output
- 400v 3-phase input
- Water-cooled
- Faster welding speeds on thicker materials
- Greatly reduces welding spatter
- Pulsed arc equals less rework
- Ready to weld in three easy steps

TransSteel 2200

- 110v/230v single phase input
- Advanced digital control MIG welder
- 10A to 230A
- Multi process
- Robust, small & portable
- Easy to operate
- Weighs only 15.5kg

TransSteel 3500 C

- 350A output
- Digital control MIG welder
- Perfect steel welding
- Compact design
- Rugged & reliable
- Very easy to operate
- Ideal for structural steel fabricators
- 400 Volt 3 phase input

TPSi 500

- Large plain text touch screen,
- Can be used with gloves on
- Future-proof, easily upgradable
- Superior Welding properties
- Even Less Spatter
- Perfect ignition every time
- Nothing else comes near

TREATING YOUR ORDER WITH THE RESPECT IT DESERVES

Looked after from start to finish

Called the 12" cube, this bespoke box is just one of a range of specially designed PWP double-walled cartons to deliver your order (*in this instance: MIG wire*) safely via the UK's courier network. Illustrated below is the step-by-step packaging process:

1 A double layer of shock absorber material is added to the bottom of the 12" cube before inserting the product.

2 Using a purpose-built vacuum lifter, a box of MIG wire is safely placed into the carton.

3 In go the biscuits (with every order over £100 net!)

4 The heavy-duty void fill follows to ensure extra protection during transit.

5 Held closed, the carton is fed through the taping machine for precise packing.

6 Labelled and sealed, the carton heads down the conveyor belt, ready for collection.

Welding extractors can come in simple single units for On-Torch or Arm extractors like the KEMPER MiniFil or the KEMPER SmartMaster or to larger central systems that cover a number of bays connecting On-Torch or Arm extraction points to a larger recirculating system.

All of our KEMPER welding extractors have W3 rated filters to remove the carcinogenic materials from the fume.

Polishing Compounds (All prices in £ sterling ex.VAT)

Code	Polishing Compounds (Price Each)	1
40-510	PV101 Green Polishing Compound Block Good cut aggression, intermediate gloss with a milky mirror finish on stainless	11.95
40-511	PV01 Brown Polishing Compound Very good cut aggression, medium to low gloss finish mainly for use on aluminium and non-ferrous - greasy	7.40
40-512	PV02 Polishing Compound Good cut aggression, medium to low gloss finish and excellent on stainless	31.28
40-513	PV03 Polishing Compound Very low cut aggression, high gloss polish on stainless (very little cut only shine)	22.65
40-515	PV05 Light Grey Polishing Compound Low cut aggression, very good gloss finish - good general purpose final polish	11.18
40-516	PV06 Polishing Compound Low cut aggression, very good gloss finish, high polish on chrome & non-ferrous metals	10.11
40-517	PV09 Green Polishing Compound Low to medium cut aggression with a good but not premium finish on stainless	14.41
40-519	PV102 Pink Polishing Compound Very low cut aggression, high quality finish for more than 90% of needs	17.18
40-520	PV106 Cut & Colour White Polishing Compound Medium cut aggression, good gloss finish - gives a better gloss than PV101 as a general purpose mirror finish	17.18

51-001

The world's first curved auto-darkening filter

Previously, you had to compromise: either a slim helmet or a wide view. With the curved G5-02 ADF, there are no compromises: a curved ADF means a really slim helmet positioned closer to your eyes providing a wider field of view.

Colours appear brighter and more realistic in both the light and dark states.

NEW HD SPEEDGLAS
G5-01 ADFLO SYSTEM

51-673

Why invest in the 3M Adflo system? - see what one of our customers had to say:
"We made an expensive mistake by buying 5x 'cheap' £500 powered-air helmets online. The guys found them to be too uncomfortable to wear so we're replacing them with the G5-01 Adflo's which we know certainly won't have that problem!" - don't buy cheap only to find they're not being used!"

ASTM-ANSI

ANSI/ISEA stands for American National Standards Institute / International Safety Equipment Association. This is a US voluntary industry consensus standard only. ANSI/ISEA 105-2016 is the latest revision which now specifies only one single cut test method can be used [ASTM F2992-15].

The cut test works exactly the same for both standards (ANSI and EN ISO 13997) but it's the way they're measured that differs. While the A1-A9 scale is comparable to the EN 388 A-F levels, ANSI/ISEA extends their scale by three levels to 6000 grams to report high cut materials more accurately.
