WE DELIVER
NATIONWIDE

A FIRST FOR THE WELD BOOK ...IT'S PRICELESS!

When the cost of raw materials has stabilised a little we hope to be able to publish prices in our next issue. To save disappointment, please call us first on 01234 345111 and we will issue you a price for your chosen items that day.

Make Something Better

~~PWP TRADE PRICE GUIDE~~

Hours of Trading

Monday - Friday: 7.00am - 5.00pm

Deliveries

All orders over £50 nett placed by 3pm for ex-stock items are normally delivered next working day, free of charge, in our local area. Due to the weight of Mild Steel (A18) MIG wire, please allow two working days and a carriage charge (TBA) for out of local area deliveries. (Subject to status).

Payment Terms

We accept most major credit cards, BACS & FPS. Certain cards may incur a handling charge, please ask for details. Credit accounts are available on request subject to reference and status checks. (Note: we can no longer accept cash or cheques).

Conditions of Sale

All sales are subject to our Standard Terms & Conditions of Sale, a copy of which is available on request. All prices ex.VAT, E & OE.

PWP Industrial

Jaguar House, Shuttleworth Road, Bedford MK41 0EP
T: 01234 345111. F: 01234 355190. E: sales@pwpind.com
www.pwpind.com

THIS ISSUE OF
THE WELD BOOK
SUPERSEDES ALL
PREVIOUS EDITIONS

COLLECTIONS

PWP does not operate a trade counter; goods can only be collected if pre-ordered by phone or email. Collections for non-account customers require payment in advance by BACS or debit/credit card by phone. *(We are unable to accept cash or cheques).*

Customers throughout the UK enjoy our next-day delivery service of ex-stock items for orders received before 3:00pm during the working week. Same-day & timed deliveries are also available... call 01234 345111 for costings.

WE HAVE PROBABLY THE LARGEST STOCK RANGE OF PROFILE CUTTING CONSUMABLES IN THE UK

TransTig 210MV**NEW FRONIUS TIG RANGE**

- 210A DC output
- Multi-voltage
- DC TIG Welding, Pulsing & TAC
- MMA Welding
- Lightweight and easy to transport
- Overload voltage protection
- USB updates protection
- Easy-change voltage cable / plug

MagicWave 230i

- 3 - 230A output
- Digital control TIG AC/DC power source
- Lightweight and easy to transport
- LCD colour display
- Intuitive and self-explanatory menu navigation
- Pulsing & Job Storage Options
- 110/230V Single Phase Input

Accupocket**BATTERY WELDER**

- Weld anywhere
- 6 x 3.2mm welding rods on a single charge
- Can run off a small 2kVA generator via the charger
- Easy to operate
- Weighs only 11Kg including battery

TransPocket 180MV

- 110v/240v
- 10A to 180A
- Adjustable Hot-Start
- Lift Start TIG Function
- IP23 Protection
- Quick-Change Primary Lead
- Weighs only 8.9kg

FRONIUS ... SHIFTING THE LIMITS**TransSteel 5000 Pulse**

- 500A output
- 400v 3-phase input
- Water-cooled
- Faster welding speeds on thicker materials
- Greatly reduces welding spatter
- Pulsed arc equals less rework
- Ready to weld in three easy steps

TransSteel 2200

- 110v/230v single phase input
- Advanced digital control MIG welder
- 10A to 230A
- Multi process
- Robust, small & portable
- Easy to operate
- Weighs only 15.5kg

TransSteel 3500 C

- 350A output
- Digital control MIG welder
- Perfect steel welding
- Compact design
- Rugged & reliable
- Very easy to operate
- Ideal for structural steel fabricators
- 400 Volt 3 phase input

TPSi 500

- Large plain text touch screen,
- Can be used with gloves on
- Future-proof, easily upgradable
- Superior Welding properties
- Even Less Spatter
- Perfect ignition every time
- Nothing else comes near

THE NEW iWAVE SERIES FROM FRONIUS

PRECISE · FLEXIBLE · DURABLE · INTUITIVE

The iWave welding system from Fronius offers an intelligent, high-end series of welding machines that set new standards in quality, flexibility and connectivity, available in power categories from 190A to 500A. Available in 9 variants and able to be configured for MIG Welding, TIG Welding (AC & DC), MMA (Stick) Welding, the iWave, which supersedes MagicWave, proves its worth with sophisticated Power-Source technology. The Multiprocess PRO option with its 3-in-one solution, is a real winner, giving the user unlimited access to all MIG processes in power categories from 300A; one welding system for all processes and process variants, equipped for the challenges of tomorrow.

Whether it is TIG, MIG, or MMA: the iWave 300i, 400i, or 500i and the Multiprocess PRO option give you complete freedom so you can ignite all your welding potential.

Below is a table giving an overview of the range of machines available.

The team at PWP will be testing for ourselves the pros and cons of the system which we hope to cover in a future issue of The Weld Book.

iWAVE WELDING SYSTEM VARIANTS AT A GLANCE

Welding extractors can come in simple single units for On-Torch or Arm extractors like the KEMPER MiniFil or the KEMPER SmartMaster or to larger central systems that cover a number of bays connecting On-Torch or Arm extraction points to a larger recirculating system.

All of our KEMPER welding extractors have W3 rated filters to remove the carcinogenic materials from the fume.

51-001

The world's first curved auto-darkening filter

Previously, you had to compromise: either a slim helmet or a wide view. With the curved G5-02 ADF, there are no compromises: a curved ADF means a really slim helmet positioned closer to your eyes providing a wider field of view.

Colours appear brighter and more realistic in both the light and dark states.

NEW HD SPEEDGLAS
G5-01 ADFLO SYSTEM

51-673

Why invest in the 3M Adflo system? - see what one of our customers had to say:
"We made an expensive mistake by buying 5x 'cheap' £500 powered-air helmets online. The guys found them to be too uncomfortable to wear so we're replacing them with the G5-01 Adflo's which we know certainly won't have that problem!" - don't buy cheap only to find they're not being used!"

ASTM-ANSI

ANSI/ISEA stands for American National Standards Institute / International Safety Equipment Association. This is a US voluntary industry consensus standard only. ANSI/ISEA 105-2016 is the latest revision which now specifies only one single cut test method can be used [ASTM F2992-15].

The cut test works exactly the same for both standards (ANSI and EN ISO 13997) but it's the way they're measured that differs. While the A1-A9 scale is comparable to the EN 388 A-F levels, ANSI/ISEA extends their scale by three levels to 6000 grams to report high cut materials more accurately.
